InnoVenture will benefit them in the future

success

Wouldn't you want your children to experience such an impact ?

Purpose Of IntelligencePlus InnoVenture.

World educators and experts believe that there is a global achievement gap-that apart from academic knowledge, 21st century skills such as Creativity & Innovation, Thinking, Problem Solving, Communication Skills, Social and Emotional learning along with essential practical life skills should be nurtured in children from a young age.

Further, via entrepreneurship education- children can meaningfully apply their knowledge and skills to real life situations and can create something of value to the society and lead the way! Therefore, we at IntelligencePlus believe in providing a platform for children to discover and exhibit their ideas.

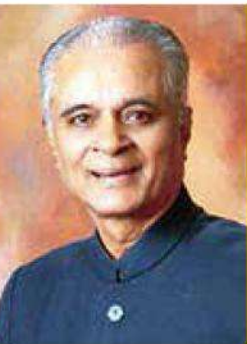

Innoventure's previous editions had around 35,000 students across India participating and benefitting from the challenge. We consider its time to reach out to more students across India and innovatively skill the young minds for the future of the country.

Intelligence Plus is proud to present InnoVenture 2017 - a 1st of its kind ideation and entrepreneurship event for children (9-14 yrs) at national level.

“While India gears up for promoting skill development and entrepreneurship; we at IntelligencePlus started our journey in this direction in 2014 itself realizing that fundamental 21st century skills need to be developed right from any early age to lay a strong foundation and equip children for the real life. The abilities of ideation, innovation and execution are the most crucial skills children need to acquire irrespective of academic knowledge. With this mission, we started InnoVenture so as to give an impetus to the initiative to skill the young minds of the nation. Backed by a lot of research and after innumerable interactions with entrepreneurs, eminent educators and leaders across, we created the the Innoventure challenge format to not just provide a platform but create maximum impact and learning for children. We invite and urge all educational heads to extend this opportunity to their students so as to collaboratively progress on the path of real education.”

- Mrs Pranjal Gundesha
(Founder CEO, IntelligencePlus)

“I believe the future of the country lies in the hands of young children. Therefore, while schools prepare children on academic coursework, it is equally important that children be equipped with 21st century skills. I was delighted when I heard about IntelligencePlus and its in-school and after-school programs for children. The initiative of InnoVenture that Mrs Pranjal has taken undertaken is based on Innovation which is the successful implementation of a new idea. It is the key to growth and development. It is helping children develop creativity and think innovatively and discover things outside the school. It is effectively taking advantage of the demographic dividend of our country. I believe that if this initiative spreads across the country, it will go a long way in contributing towards the nation's development.”

- Padma Shri Dr S. B. Mujumdar
(President, Symbiosis International University)

Why should schools participate in the Challenge?

1. 1st ever platform for children to develop and demonstrate their ideation and entrepreneurial skills
2. 1st of its kind challenge based on creativity, innovation and real life situations.
3. Opportunity for children to be trained by CEO's, entrepreneurs and mentors.
4. Introduction to many tools and techniques essential for real life success.
5. Awards, cash prize and a widespread recognition for the schools and their students.
6. The Innoventure challenge is aligned to the country's mission to Skill Young India for real life success.

Testimonials : Judges & Entrepreneurs

With this initiative, IntelligencePlus is making children to think creatively and the platform provided is remarkable.

-Mr. Anil Goel
(Chairman, Chamber of India Industries CII, Pune)

I knew that I will be prepared for some surprises, but looking at the energy that I saw, kind of articulation among the students was amazing. InnoVenture was positively a great experience.

- Mr. Manoj Kothari
(Managing Director and Principal Strategist, Turian Labs)

Student getting exposure to design thinking and business models is something very phenomenal. I really hope this event actually becomes pan India

-Mr. Abhay Jere
(Associate Vice President and Head, Persistent Labs)

TESTIMONIALS : Parents, Teachers & Students

InnoVenture platform is very Innovative and Creative and the kids are getting a lot more to learn than we thought of. This is entirely a different trend of education and we look forward to participate in the coming years.

Parent of Samhita Kannan from Vibgyor High Bannerghatta, Bengaluru

Kids require so many things for their future and they are away from platforms which inculcate innovation, innovative thoughts, design thinking. InnoVenture is a good platform where we see future entrepreneurs with innovative ideas in our kids

Parent of Pragya Dubey from Army Public School Golconda, Hyderabad

It was a great platform to learn and showcase a lot of creative thinking and innovative skills. It also taught us that being creative is important, but being empathetic sensitive towards the community is also a must.

Tulika Bhattacharya
Teacher - Sanjay Ghodawat International Cambridge School

My experience was fantastic. I have participated and won many competitions which are based on academics, but this is different. I was inspired by the lectures which I attended on the first day. I really like Innoventure. I would like to participate the next year as well.

Shreya Phadke from Podar International School - Pimpri

InnoVenture has given us a chance of exploring our creativity and critical thinking that we have within us. The interactive sessions will help us in later part of life as we learned about entrepreneurship skills and whatever knowledge we take from here would enhance and bless us with lot of information and knowledge.

Mana Shah from Fountainhead School, Surat
